

Carver County Family Child Care Licensing
Request for use of an alternate disinfectant
MN Rule 9502.0435 Subp. 13D & MN Statutes 245A.148

Provider Name: _____

Email Address: _____

*MN Rule 9502.0435, Subp 13 D, requires that **bleach and water** be used when disinfecting the diaper changing area. MN Statutes 245A.148 established in 2013, allows a child care provider to disinfect the diaper changing surface with an alternate disinfectant as long as it meets the specified requirements.*

- I have reviewed the approved list of disinfectants on the back-side of this form, and the product I will be using is: _____ **or,**
- The product I would like to use is not listed on the back-side of this form, and I would like it reviewed:

The product I would like to use is (*exact and full name on the label*): _____

Manufacturer of the product: _____

RULE REQUIREMENTS	Yes	No
Does the product have an EPA registration number on the label? The products EPA reg. no. is: _____		
Is the product effective against Staphylococcus aureus, Salmonella choleraesuis, Pseudomonas aeruginosa as listed on the label?		
Does the product have a 10 minute or less contact time to kill the organisms it is effective against?		
Are directions for mixing and use clearly described?		
Does the product label state/show it is for home use?		
Does the product include triclosan or any derivatives of triclosan?		

 I understand that I am responsible to ensure the product is used according to manufacturer's directions.

 Provider Signature

 Date

- Please feel free to submit any supporting documentation that confirms the requirements of this product as an approved alternate disinfectant (photo of the product/label, internet information, etc.)
- The alternate disinfectant request will be forwarded to Carver County Public Health. You will be notified via email whether your request has been approved or denied.
