-:-Did You Know-:-

Attached is a copy of Carver County Public Health 2019 Vaccine Clinic Schedule
Please share with your Families

Attached you will find the 2019 FREE C.A.R.S. Training through Carver County Public Health
You must call to register for this Training

Attached is a Professional Development Advisor Session flyer for those of you that are interested in working with a Professional Development Advisor in Carver County. These sessions are for anyone that would be interested in learning more about Parent Aware or are for more seasoned providers who have questions about finding their Learning Record, tracking training, Parent Aware training requirements, or Develop memberships and organization accounts. These sessions are not required but are recommended. Due to limited space you must RSVP in advance.

Upcoming Training

All January-April 2019 Training Events are on Develop and open for registration. See link below:

<https://www.developtoolmn.org/>

All January-April 2019 printable training calendars by County are now available on the Think Small [website](#) or the link below:

-:-RULE REMINDER!

9502.0435 SANITATION AND HEALTH

Subp. 16. Care of ill children, medicine administration.

The following provisions must be followed for the care of ill children and the administration of medicine. §

- A. The provider shall notify the parent immediately when a child in care develops any of the following symptoms: §
 - (1) underarm temperature of 100 degrees Fahrenheit or over, or an oral temperature of 101 degrees Fahrenheit or over;
 - (2) vomiting;
 - (3) diarrhea; or
 - (4) rash, other than mild diaper or heat-related rash.

- B. The provider shall follow written instructions from an authorized agent or the physician of an ill child placed in the provider's care if the child has any of the illnesses specified in item E.

- C. The provider shall require that a child's parent notify the provider within 24 hours of the diagnosis of a serious contagious illness or parasitic infestation listed in item E so the provider may notify the parents of other children in care.

- D. The provider shall inform a parent of each exposed child the same day the provider is notified a positive diagnosis has been made for any of the illnesses or parasitic infestations in item E.

- E. The provider shall notify the authorized agent or Minnesota Department of Health of any suspected case of reportable disease as specified in part 4605.7040. The agency shall provide the provider with a copy of part 4605.7040 at the time of initial licensure.

- F. The following govern the administration of medicine by the provider to children in care:
 - (1) The provider shall obtain written permission from the child's parent prior to administering medicine, diapering products, sunscreen lotions, and insect repellents. Nonprescription medicines, diapering products, sunscreen lotions, and insect repellents must be administered according to the manufacturer's instructions unless there are written instructions for their use provided by a licensed physician or dentist.
 - (2) The provider shall obtain and follow written instructions from a licensed physician or dentist prior to administering each prescription medicine. Medicine with the child's name and current prescription information on the label constitutes instructions.

It is that time of year again when a variety of illnesses may run through your child care. You are required by the licensing rule to notify parents if their child has a temperature, vomiting, diarrhea, or rash. Every provider has different sick policies and procedures, but what you have listed in your policy as well as licensing requirements is what you need to follow regarding whether or not a child should be at your home.

Make sure that you notify Minnesota Department of Health at **(651) 201-5414** if a child in your care has one of the reportable diseases. You can also call Carver County Public Health to discuss exclusion, etc. They can be reached at **(952) 361-1329**. If a child does have one of the reportable diseases, you are required to follow instructions from the physician on how to care for the child if and when they are in your care. The parents need to notify the provider within 24 hours of the diagnosis of a reportable disease. The provider must then inform all parents of each exposed child the same day the provider is notified of a reportable disease positive diagnosis. Due to data privacy you cannot share the name of the child that was diagnosed with the reportable disease. As an example, you would say, "A child in care was diagnosed with measles. I am required to notify you of this diagnosis, but I cannot disclose the name of the child to you."

I have attached the list of reportable diseases. This list can also be found at: <https://www.revisor.mn.gov/rules/4605.7040/>.

-:-Tip To Try-:-

Snow Painting

Snow Paint Recipe

Food coloring
Squirt bottles

Method

Combine several drops of food coloring with cold water in a squirt bottle and mix. Use one bottle for each snow paint color that you wish to make!

If at any time your email address changes or you wish to be removed from this list, simply reply to inform me and I will be sure to take the proper action for you. Please be aware that when important licensing changes occur, this does not mean that those that do not have access to email will not be informed. It will just take a little longer for those without email to receive notification, as it will be sent through regular US Postal Service.

If you have one or two ideas that you think others would like to use or benefit from, please feel free to send them to: tpsprengeler@co.carver.mn.us

They can be fun art projects, space saving ideas, safety tips, food recipes that have been a hit, or anything that has worked for you that others could benefit from.
