

# ROLLING ACRES ROAD

## Trail Crossing Improvements

Anticipated construction date:  
**Late Summer/Fall 2020**

### Improvements

- » Two roadside and one overhead **rectangular rapid flashing beacons (RRFB)** activated by trail users will provide safer crossing of road.
- » Pavement-mounted **delineators, reduced lane widths, and advanced signage** will help lower vehicle speed and increase driver awareness of trail users.
- » **New lighting** on west side of road will help illuminate trail crossing.

Improvements are an interim solution until long-term improvements recommended within the Arboretum Area Transportation Plan can be implemented.

**Rectangular rapid flashing beacons**

*In advance of trail crossing*

**Wide shoulder**

*In advance of trail crossing*
